The last I remembered we still live in America, the land of the free and freedom of choice. If I choose to listen to satellite radio because it offers me a better product and caters to my listening habits it is my right to do so. My listening choices should not be limited by the NAB or the FCC. It is shameful that the NAB is petitioning against our freedom to choose and what's worse is that the FCC is hearing their calls to limit what we can listen to. Please don't let me lose faith in the system and way of life I defended for twenty years as an active member of the US Air Force. THE RIGHT TO CHOOSE!
